Just did a check on the hidden service menu, details as follows, Delivery Part No.. 1TOO35680C HW Version H04 SW Version 2760 Map West Europe Navteq Map Version 7333 HDD ST Number Partitions 2 So my question; If I want to upgrade the maps to V9 (2013) can I do it straight or do I need to update firmware? I understand I may not be able to get latest maps (V15) without firmware upgrades but I'm not sure about V9.. I disconnected the Nav antenna and it made no difference, so I figure this might be my issue.. So when buying a replacement antenna on that auction site, the seller also had a dvd of V9 maps for sale, so I plumped for them as well.. Sorry if this is the wrong section IN addition, VWNavi is down and I'm getting desperate! Have an original VW RNS510.. You agree that when you charge fee-based service before expiry of the deadline requirements until the date of cancellation werden. 773a7aa168 [Max 3d For Mac Os X](#)
